

The **IMBY Home and Farm Hazard Workshop** was developed by Florida AgSafe, the University of Florida Agricultural Safety Program to help people learn about and eliminate possible hazards to their health and safety from their homes or workplaces. Learn more about making your home or workplace safer, visit our Web site:

**[www.flagsafe.ufl.edu](http://www.flagsafe.ufl.edu)**

And remember...

***Be Aware!***

***Be Alert!***

***Be Alive!***

**IMBY Home and Farm  
Hazard Hunt Workshop**

features a video in which a mother tells the true story the loss of her 11-year-old son in a farm-related incident. This story will motivate you to take action to make your home or farm a safer, healthier place. After the video, there will be a presentation about specific ways to improve safety in your home/farm environment. The presentation will include development of an “action plan” that you can take home and use with your family to get all those trouble spots taken care of... probably things you’ve been meaning to do! And maybe a few you weren’t aware of.

We look forward to presenting this valuable program to you. Together with your interest and participation, we can make our community a healthier and safer place to live and work.

**Farm and Home  
Safety Hazard Workshop**

Make your home or workplace safer. Join your friends and neighbors to take the safety challenge!
